

INT. OFFICE – DAY. NIKI/NICK is seated on a stool. A bomb is attached to the underside of the chair. The situation is deadly serious. Victoria/Vick enters looking for Nikki/Nick.

NIKI/NICK/
Don't touch anything!!

VICTORIA/VICK
What happened?

NIKI/NICK
There's a bomb. Under the chair.

VICTORIA/VICK
Where's Maxwell?

NIKI/NICK
He's working for them. He left about 10 minutes ago.

VICTORIA/VICK
Looking under the chair. I don't see a timer. Did he say anything? We've got to stop him

NIKI/NICK
It has a remote. Maxwell took the transmitter with him. He's going to blow the reactor when he gets in the clear. He'll need twenty miles to be safe. That should give us about 15 minutes at best.

VICTORIA/VICK
Sit tight. *(checks the chair)* Could also be a pressure plate under the chair. You can't be moved. *Into her radio* Zack, we have a situation here. Evacuate the area. Notify NRC. Tell them we need decon teams of standby. And get NSA to run a check on Maxwell's last 48 hours.

NIKI/NICK
Can you disarm it?

VICTORIA/VICK
I wish there was time to study some other bombs Murphy built. This wiring is very complex. But yeah, I think I can disarm it.

NIKI/NICK
You Think?!

VICTORIA/VICK
Yeah, I think. Hey, If you go. I go.
Any idea where Maxwell went?

NIKI/NICK

Someplace where the signal couldn't be jammed. He seemed very confident.

VICTORIA/VICK

It would have to be someplace that has a very powerful transmitter that can shift rapidly between frequencies.

NIKI/NICK

The observatory in the mountains above San Juan! It's the highest point on the island. It has one of the most powerful transmitters in the world.

VICTORIA/VICK

Into her radio.

Zack, get a team to the observatory. Find Maxwell and take him out. ... Yes take him out. He's the mole. *Victoria starts checking the wiring, picks up a pair of wire cutters.)*

VICTORIA/VICK

What if I just cut them all at once?

NIKI/NICK

Victoria!!

VICTORIA/VICK

Just kidding.

(sweat drips off Victoria's forehead as she works on the bomb).

So far I've cut a yellow wire and a purple wire and we're still alive.

(She concentrates on a group of wires. It's a complex mass of connections and wires.)

NIKI/NICK

What's next?

VICTORIA/VICK

Red then blue? Or blue then red? You call it.

NIKI/NICK

Go with the green.

VICTORIA/VICK

The green? Why?

NIKI/NICK

The guy who built it is I.R.A.

VICTORIA/VICK

So green has to be his favorite color? Okay – we'll go with the green.

NIKI/NICK

This time keep your eyes open.

(Victoria shakes her head. NIKI/NICK holds her breath. Victoria snips the wire).

VICTORIA/VICK

I think we found the anti-tampering circuit.

(Victoria snips the wire. The bomb is disarmed Victoria has freed NIKI/NICK. Both smile.)
